

DEANNA FOX

Get to know one of the new faces this year at the Calgary Christian secondary campus: Ms. Fox. Visit her staff page [here](#) for more.

What do you like to spend your free time doing? I love reading fantasy books and finding new shows on Netflix! Either that, or I'm hanging out with my niece and nephew - both adorable and incredibly clever. I've worked very hard to secure my status as "the favourite auntie" and I can't slack off or they'll start to love my sister more.

What are your hobbies? Reading and writing! For reading, I mostly stick to fantasy or young adult fiction. For writing, I've got a couple novel projects on the go - it's just a matter of sitting down and getting some work done with them!

What is your favorite store? Chapters...Each Christmas, I have a tradition of treating myself to a couple new books to read over Christmas break!

What is your favorite restaurant?
My parent's house

What is your favorite time of day? Sunset! The air gets just a bit cooler and the sky looks beautiful, and usually it means you're done work for the day!

What is your favourite colour?
My long-standing favourite colour is blue, but green has been growing on me!

What kind of music do you enjoy listening to? I love moody indie music! The YouTube channel "IndieAir" has supplied most of my favourites for the past year.

What is your favorite movie? Hm...I can't think of one as an adult, so I'll admit that from the age 7 to 15, my favourite movie was "Quest for Camelot." So good!

HIGH SCHOOL SCIENCE AND MATH

What is your favourite book (or genre)?

The Naming! The Naming, by Allison Croggan. It's the first in a series of four books - essentially Lord of the Rings, but if Frodo was a 16-year-old girl who grew up as a slave but is secretly very powerful. My mom and sister have loved the series for years, and we're using audio books to convince my dad to love it too!

What is your favorite food and/or treat? Sour soothers, for sure. But you can only have so many of them before your tongue gets all weird, so you must exercise some restraint. Cookie dough on the other hand can be eaten without restraint.

What is your favorite season of the year? Fall! The leaves changing colour, the jackets, the scarves, the crisp weather!

Do you enjoy coffee and/or tea or neither?

And how do you like it (cream, milk, sugar, etc.) Neither...I've never enjoyed the taste of coffee, and I've only discovered one tea that I like. Licorice root tea. I'm told by my sister that it's a ridiculous tea to have as my "favourite."

Do you have any allergies? Or special diet?

I'm allergic to cats - although that doesn't stop me from cuddling with them from time to time. My eyes just swell up like crazy afterward, but that's a price I'm willing to pay if the cat is cute enough. And pistachios make my chin itch!
