

CCS SECONDARY STUDENT WORK PROGRAM

BY NICOLE ZWART
(SOUTH CAMPUS CARE LEAD)

Did you know that our maintenance team has been hiring students for nearly 30 years? Arnold Zwart (North Campus Care Lead) started with hiring a few high school students to help with the after school cleaning and it has grown from there. We now hire a mix of university-aged CCS alumni and high school students throughout the year to do after school cleaning, annual painting, summer maintenance projects and more! We have also partnered with Palliser Beyond Borders to offer high school students a chance to earn credits through a work experience program. Many former employees now have children of their own attending the schools and even some of the staff worked with us when they were in high school! It has been a joy for our maintenance team to work alongside the students and build relationships with them. It is a blessing to have our community work together like this for so many years!
