

Numbers in Context

Grade Seven Math

Parents of Grade Seven Students including a Doctor, Business Owner, Accountant, Financial Planner, Project Manager, Construction Worker, and more, recently participated in the "Numbers in Context" Speaker Series. These special guests shared with the students about their work and how numbers are part of it in varying and dynamic ways. Hearing about their journeys, successes and failures, and real-world applications was a beneficial learning opportunity to make math more meaningful for these learners.
